

Ingredients Laminine

Ingredients

OPT9 Proprietary Blend (620 mg) (Fertilized Avian Egg Extract, Marine Protein, Phyto Protein)

Other Ingredients: Vegetable Gelatin, Silicon Dioxide, Magnesium Stearate

Supplement Facts

Suggested For Adult Use: As a dietary supplement, take 1-4 capsules a day

Serving Size: 1 Capsule

The ingredients in Laminine™ are food extracts that are listed on the Generally Recognized As Safe (GRAS) list

The egg that is used in Laminine™ is processed in a unique manner and it may, or may not, trigger the same type of allergic reactions that store-bought eggs may cause in people with egg sensitivities. Obviously, patients with egg allergies should proceed with great caution, but please be

advised that many people with egg allergies have found Laminine to be of benefit to them.

The marine protein is derived from various proprietary marine sources of fish, which comes from the clean waters of the Pacific Ocean, off Australia and New Zealand. None of the marine life are endangered species.

Use of vegetable proteins

Vegetable protein has an essential amino acid profile, which is very close to that of the ideal protein for human nutrition (FAO/WHO 1985 and 2002). For Laminine™, a patented process further isolates these proteins to eliminate the compounds, which neutralize the benefits of the essential amino acids.

The result is an ingredient, which is high in Glutamic acid, (further enhancing the cognitive function of the brain), branched chain amino acids (to counter insomnia), Lysine (to control release of serotonin, controlling moods) and Arginine (promoting Nitric Oxide and growth hormone formation). These specially isolated proteins therefore adds a synergistically potent composition to enhance brain activity.

Use of Marine Proteins

The high levels of Glycine in the specially extracted marine protein used in Laminine™, combined with a significant amount of hydroxyproline to stabilize the glycine, makes it a primary candidate for a terrific brain food. By itself, Glycine is a neurotransmitter, primarily utilized by the brain to control glutamate levels. As a combination within OPT9, it becomes a powerful force to enhance memory function in the brain.

Regular tests are made to ensure the safety and quality of the ingredients. A doctor's prescription is not required to buy Laminine but it is advisable to consult your GP first, especially if you are pregnant, have any medical conditions.
